

# TATIANA LOPES DA LUZ

FullStack Developer

## CONTACT

0762-609-244

tati\_daluz\_89@hotmail.com

<https://www.linkedin.com/in/tlopesdaluz>

Gothenburg, Sweden

## SKILLS

React  
Nextjs  
Typescript  
Nestjs  
Mongodb  
PostgreSQL  
MySQL  
TypeORM  
Docker  
Jest  
Scrum  
Git  
NodeJS

## EDUCATION

### IT INSTITUTION | 2022 -2024

Comprehensive program in Software development covering Backend APIs development, Frontend development and Integration, Database design and Management

## LANGUAGES

Swedish  
English  
Portugese  
Creole

## PROFILE

I'm a full-stack developer who genuinely enjoys the puzzle of building software, from designing smooth interfaces to setting up reliable backends. I do my best work in collaborative, Agile teams where everyone is focused on shipping good products. Looking for a developer role where I can dive into the stack and help build meaningful software.

## WORK EXPERIENCE

### Software Developer

#### Skolarhub

*In development*

Gothenburg Sweden

April 2025 - till date

- Designed and implemented the database schema for a multi-tenant school management and video streaming SaaS platform.
- Developed and managed database entities using NestJS, TypeORM, and PostgreSQL.
- Implemented asynchronous task processing using Redis Streams to improve system scalability and responsiveness.
- Built an asynchronous email processing workflow by publishing email payloads to Redis Streams for consumption by a dedicated email service.
- Developed unit tests and end-to-end (E2E) tests for backend modules to ensure reliability and maintainability.
- Implemented caching strategies to reduce database load and improve API response performance.
- Set up analytics logging and monitoring mechanisms for tracking system activities and application events.
- Contributed to backend architecture and performance optimization for scalable service delivery.

*Tech Stack: NestJS, TypeORM, PostgreSQL, Redis, REST APIs, Unit Testing, Jest E2E Testing*

### Software Developer Intern

#### Junico AB

Gothenburg Sweden

2023 - 2024

- Developed and implemented frontend features using React, TypeScript, and JavaScript with a focus on performance, responsiveness, and usability.
- Built reusable and responsive UI components using React and styled-components to ensure cross-device compatibility.
- Integrated REST APIs to deliver dynamic and interactive user experiences.
- Collaborated with designers and product teams to translate UI/UX wireframes into functional web applications.
- Developed and maintained RESTful APIs using Node.js and Express.
- Implemented authentication, authorization, user roles, and permission management for secure platform access.
- Designed and optimized MySQL database schemas for efficient data storage and retrieval.
- Managed server-side functionality including file uploads and business logic handling.
- Applied Test-Driven Development (TDD) practices and wrote automated tests to ensure code quality and reliability.
- Participated in Agile development processes including sprint planning, stand-ups, and retrospectives.
